Bamboo Collection

Sustainability is at the *heart* of Sunwood's commitment to the *environment*.

We ensure that the wood used in our blinds comes from sustainably managed forests, ensuring minimal impact on the ecosystems in which they grow. Bamboo, which regenerates after 5 years, helps prevent soil erosion and absorbs 4 times CO2 than forests and produces 35% more oxygen into our atmosphere.

BAMBOO

Each bamboo cane is thoughtfully harvested with care, preserving the root so the plant can keep growing without needing to be replanted after every harvest. Bamboo truly showcases nature's brilliance, it even produces its own natural antibacterial agent, which means no pesticides are needed. This makes bamboo the perfect eco-friendly choice.
